

# Sadler Energy and Environmental Services Ltd

## Environment and Quality Policy

**Sadler Energy and Environmental Services Ltd** (Sadler Energy) is an energy and environmental consultancy offering sustainability advice, services and certification to the construction industry, including SAP Assessments, Code for Sustainable Homes and Air Tightness Testing.

Sadler Energy is committed to the care of the environment, prevention of pollution and to continually improve the quality of their products, services and environmental performance. Sadler Energy has implemented a documented Integrated Management System.

Sadler Energy will always meet the specified requirements of their customers and seek to satisfy or exceed their expectations. The organisation ensures that all their activities are carried out in compliance with the relevant environmental legislation and other requirements and meets, or where possible, exceeds the requirements of ISO 14001:2004, 9001:2008 and ISO 17025:2005.

***The following key activities have been identified as significant:***

- **Energy** – Sadler Energy is committed to minimising their consumption of non-renewable energy sources and to continually research alternative sources and technology to reduce consumption of energy across all activities.
- **Waste** – Sadler Energy works to minimise the wastes it generates and their impacts by seeking opportunities to reduce, reuse, recycle and recover otherwise redundant resources
- **Transport** – Sadler Energy is aware of the environmental impacts of their transport operations, and seeks ways to reduce them wherever practical through the use of sustainable transport and IT solutions
- **Quality** – Sadler Energy operates controls to ensure the quality of their business processes meets and exceeds the requirements of their clients
- **Training** – Sadler Energy is committed to the ongoing training and education of their staff so that the company can continue to provide the most appropriate advice and services
- **Procurement** – Sadler Energy works to ensure that the products, services and materials which it purchases are as sustainable as practical.
- **Environment** – Sadler Energy are committed to improving the environmental quality of the building industry through training, leadership and certification
- **Testing** – Sadler Energy ensure that where testing is undertaken this is completed to the highest standard complying with all regulatory requirement and without prejudice

Sadler Energy has introduced systems that will set, achieve and review measurable quality and environmental objectives. The directors will provide appropriate resources as required in order to enable the company to meet these objectives.

All staff are made aware of the aims and objectives of the Integrated Management System and associated Operating Procedures and are expected to adhere to their requirements. Everyone is encouraged to suggest ways in which the Integrated Management System can be improved. Where appropriate, sub-contractors and visitors to Sadler Energy's premises are required to acknowledge and adhere to the company's Environment and Quality Policy and relevant operating procedures.

Sadler Energy communicates its Environmental and Quality Policy to all staff through notice boards, staff induction and training. It is available to all stakeholders through the company website ([www.sadlerenergy.co.uk](http://www.sadlerenergy.co.uk)) and forms part of all contracts with our clients.
